

SEPTEMBER 27 & 28, 2018

LANDSCAPE IRRIGATION AUDITOR TRAINING

8:00 AM to 5:00 PM Both Days

CPC Cato Campus, Charlotte, NC

Learn the methods to evaluate and test an irrigation system to determine improvements or to create an accurate schedule.

Ideal for all residential, commercial, institutional, and sports field managers, superintendents, and lead technicians. Also, this is the recommended course for the IA auditor certification exam.

- Understand the practical effects of sprinkler pressure, placement, and nozzles on plant health and appearance.
- Conduct field tests and analyses using industry standards.
- Calculate and evaluate sprinkler distribution uniformity.
- Establish the net precipitation rate for any zone.
- Know what influences the water needs of the plants.
- Determine soil types and conditions affecting irrigation efficiency and plant health.
- Create schedules based on the plants, soils, and sprinklers.

Note: IA certification application and exam fees are additional: www.irrigation.org

Joining CIA will save MORE than the cost of membership in fees!
SAVE \$75 on course, \$25 on manual, \$\$\$ on future CE courses & CIA events

The ideal way to earn CE points or prepare to pass the certification exam!

Course includes:

- 2 days of face-to-face instruction
- In-field practice on a real irrigation system
- All handouts
- Continental breakfast & lunch both days
- Refreshments all day

Nationally recognized instructors:

- Kurt K. Thompson and Chris Pine
- Both are certified auditors & contractors
- Trained hundreds of contractors nationally
