Table of Contents

Introduction and Safety	7	Appendix D: Determination of Maximum Allowable Pipe Velocities	211
Chapter 1: Basic Pivot Concepts	1	Appendix E: Calculating Pressure Section by Section	221
Chapter 2: Assemble an Inventory of Site Conditions and Requirements	23	Appendix F: Calculating Nozzle Sizes Along the Center Pivot Lateral	243
Chapter 3: Analyze the Resource Inventory	41	Appendix G: Calculate Maximum Irrigation Interval	255
Chapter 4: Calculate Hydraulic Requirements	59	Appendix H: Finding the Most Economic Lengths for Larger And Smaller Pipe Sizes in a Center Pivot Lateral	271
Chapter 5: Nozzle the Center Pivot	99	Appendix I: Example Span Lengths	279
Chapter 6: Pumps and Controls	139	Appendix J: Application Rate and Depth Relationships	283
Chapter 7: Design for Chemigation Equipment	155	Appendix K: Example Layouts	289
Chapter 8: Manage the System Operation	159	Appendix L: Calculate Net Positive Suction Head	293
Chapter 9: Draw Up Plans and Specs	165	Appendix M: Glossary	299
Chapter 10: Refine and Adjust the Design Parameters	169		
Appendix A: Units of Measurement and Conversions	189		
Appendix B: Calculation of Irrigated Area	193		
Appendix C: Charts Showing Friction Loss Gradients and Inner Diameters of Pipe and Minor Loss Coefficients	199
