

# Irrigated Soils

## Student Workbook

By Robert D. von Bernuth  
ISBN: 978-1-935324-14-0

Developed  
for the

Smart practices.  
Sustainable solutions.

August 2013

## Table of Contents

Introduction .....	7	Readily Available Water .....	22
Objectives .....	7	Water Available to Plants .....	22
Importance of Soils in Irrigation .....	7	Surface Tension of Water .....	23
Components of Soil .....	8	Soil Water Potential (Energy) .....	24
Soil Profile .....	8	Salts in Water and Soil Solutions .....	25
Soil Physical Properties .....	9	Measuring Soil Moisture .....	27
Soil Texture .....	9	Direct Measurement .....	27
Five Basic Textural Classifications .....	10	Indirect Methods .....	27
Descriptions of Selected Textural Classes .....	11	Tensiometry .....	27
Loamy Sand .....	11	Other Methods .....	27
Sandy Loam .....	11	Application Rate and Infiltration Rate .....	29
Loam .....	11	Application Rate .....	29
Silty Clay Loam .....	11	System Design .....	29
Silty Clay .....	11	Slope and Surface Storage .....	29
Soil Classification .....	12	Surface Residue .....	30
Examples Using the USDA's Online		Potential Runoff .....	30
Web Soil Survey .....	13	Actual Runoff — Landscape Application .....	31
Soil Structure .....	14	Runoff Control .....	31
Important Soil Properties .....	15	Soak Time .....	32
Bulk Density and Porosity .....	15	Cycle and Soak .....	32
Soil Intake Rate (Infiltration Rate) .....	15	Actual Runoff — Agricultural Applications .....	32
Water Storage and Drainage .....	16	Drip Irrigation Systems .....	34
Soil Moisture Extraction .....	18	Water Movement in Layered Soils .....	34
Soil Moisture Sampling .....	20	Laboratory Demonstration .....	36
Organic Matter .....	22	Situations Where Layered Soils	
		Are Encountered .....	37
		Conclusion .....	37
		References .....	38
		Web Sites .....	38
		About IA .....	39
		About the Foundation .....	39
