Table of Contents

Introduction to Design Capacity and Available Dynamic Pressure	7
Objectives	7
Definitions	8
Design Capacity.....	8
Dynamic Pressure at Design Capacity	8
Estimated Dynamic Pressure at Worst Case Sprinkler Head	8
Determining Design Capacity for Metered Municipal Systems	8
Definitions	9
Example.....	10
Design Capacity for Metered Municipal Systems Summary	16
Practice Problems #1	19
Determining Design Capacity and Operating Pressures by Assumed Flow	23
Definitions	23
Example.....	25
Determining Design Capacity and Operating Pressures by Assumed Flow Summary	28
Practice Problems #2.....	29
Flow Tests for Determining Design Capacity and/or Available Pressure	33
Flow Test With Desired Sprinkler Operating Pressure: Determines Design Capacity	34
Flow Test With Desired Design Capacity: Determines Available Operating Pressure ...	35
Flow Tests for Determining Design Capacity and/or Available Pressure Summary.....	36
Practice Problems #3.....	37
Conclusion	41
References and Suggested Supplemental Reading	43
Manuals and Books	43
Web Sites.....	43
Glossary of Terms	44
Please note: Glossary terms are <i>bold italic</i> the first time they appear in text.	
About the Foundation	46
About IA	46
Section A — Worksheet Templates	47
Section B — Friction Loss Charts	51
