## Table of Contents

Introduction to Irrigation Pipe Sizing .....	7	Friction Factor Method Summary .....	40
Objectives.....	7	Velocity Limit Method.....	40
Lateral Line Pipe Sizing and the Friction Factor Method.....	8	Mainline Pipe Sizing vs. Lateral Lines .....	41
Friction Factor Formula .....	9	Velocity Limit Method —	
Using the Friction Factor Method.....	9	Single Valve Operation .....	41
A Note About Pipe Types .....	12	Practice Problems #3.....	47
Using Friction Factor Sizing Charts .....	12	Pipe Sizing Summary.....	51
Practice Problems #1.....	15	Velocity Limit Method Summary .....	51
Design Decisions Affecting Pipe Sizing .....	27	Sizing Mainlines with Multiple	
Effect of Sprinkler Operating Pressure		Valve Operation.....	51
on Pipe Size.....	27	Pipe Sizing Summary .....	51
Effect of Changing Valve Location		References and Suggested	
on Pipe Size.....	28	Supplemental Reading.....	52
Effect of Changing Allowable Sprinkler		Manuals and Books .....	52
Pressure Variation on Pipe Size.....	29	Web Sites.....	52
Practice Problems #2.....	31	Glossary of Terms.....	53
Exceptions to Standard Friction		Please note: Glossary terms are <i>bold italic</i>	
Factor Calculations .....	35	the first time they appear in text.	
Modification of the Friction Factor Due to		Figure Legend .....	55
Elevation Change Between Sprinklers .....	35	About the Foundation .....	56
Modification of the Friction Factor		About IA.....	56
Due to Change in Elevation Between		Section A — Answers to Examples .....	57
the Valve and the First Head.....	37	Section B — Friction Loss Charts .....	610
Modification of the Friction Factor Because			
of Long Length of Pipe Between Valve and			
the First Sprinkler on the Lateral Line.....	38
