## Table of Contents

Introduction .....	7
Objectives .....	7
<b>Precipitation Rates for Typical Landscape Sprinklers</b> .....	8
High Precipitation Rates – More than 1.0 in./h .....	9
Moderate Precipitation Rates – 0.5 to 1.0 in./h .....	9
Low Precipitation Rates – Less than 0.5 in./h .....	9
<b>Calculating Sprinkler Precipitation Rates</b> .....	9
Full-circle Sprinkler Precipitation Rate Calculation .....	9
Sprinkler Precipitation Rate Calculation for All Arcs .....	11
Total Area Method of Precipitation Rate Calculation .....	12
Single Row Sprinkler Calculation .....	13
Practice Problems #1 .....	15
<b>Matched Precipitation Rate</b> .....	21
Radius Adjustment Affects Precipitation Rates .....	22
Matched Precipitation Rates for Spray and Rotor Heads .....	23
Matching Precipitation Rates for Spray Heads .....	23
Matching Precipitation Rates for Rotor Heads .....	23
Distribution Uniformity and Matched Precipitation Rate .....	26
The Dry Spot Drives the System .....	27
Zones with Unmatched Precipitation Rate Heads .....	28
Rules for Matched Precipitation Rates .....	29
Practice Problems #2 .....	31
<b>Precipitation Rate Summary</b> .....	37
<b>References and Suggested Supplemental Reading</b> .....	38
Manuals and Books .....	38
Web Sites .....	38
<b>Glossary of Terms</b> .....	39
Please note: Glossary terms are <i>bold italic</i> the first time they appear in text.	
<b>Figure Legend</b> .....	40
<b>About the Foundation</b> .....	41
<b>About IA</b> .....	41
